Summary

Drawing on my comprehensive training at **Uncommon Bootcamp**, I'm a highly motivated software developer with a proven track record of creating impactful applications. I've designed and built a malaria dashboard web app which demonstrates how I can transform static data displays into engaging, interactive experiences by implementing dynamic geographical visualizations that provide deeper, more intuitive insights. I'm currently developing a learning management system, showcasing my ability to tackle complex projects from concept to completion.

Skills

Python • JavaScript • React • HTML/CSS • Node.js • PostgreSQL • MySQL • Firebase

Work Experience

Software Developer

Feb 2025 – Sep 2025 • 7 mos

Uncommon • Internship

Remote

Technologies: Python

During the course of the bootcamp, I managed to learn exciting and contemporary technologies such as HTML/CSS, JavaScript, React, TypeScript, Next.js, Node.js, REST APIs, Relational Databases, PostgreSQL, Firebase which enabled me to develop a dynamic, full-stack dashboard with Next.js and Tailwind CSS, featuring interactive, client-side components like filterable data tables, time series charts, and a responsive geojson map to visualize complex health data as per country.

Projects

Interactive Malaria Dashboard

Jul 2025 – Sep 2025 • 2 mos

1 coworker

Technologies: Next.js • Tailwind CSS • TypeScript • Shadcn • Leaflet

Education

Software Developer: Software Development

Feb 2025 – Dec 2025 • 10 mos

Uncommon

Harare,

Grade/GPA: Currently Enrolled

A eleven months bootcamp program which has the first three months of a crash course consisting of UI/UX, Digital Marketing and Software Development then you get to specialise on one of the three up until the completion of the bootcamp program. The software development program is full stack based, from front end to back end in web development.
